What is TEI Publisher ?

- ❑ TEI Publisher is ...
 - ❑ an easy-to-use tool to publish your TEI XML files
 - ❑ a *prêt-à-porter* application customizable with few tweaks
- ❑ Few platforms created with TEI Publisher

[When the Wall
Came Down](#)

[Van Gogh Letters](#)

[Shakespeare's
Plays](#)

[Early English
Books](#)

[Digital Scholarly
Editions](#)
(Made by me)

Discovering TEI Publisher

- ❑ Demo Collection:
 - ❑ Various XML files (letters, plays, novels, etc.) with each their ODD and templates, to showcase what TEI Publisher has to offer by displaying specific features
 - ❑ Link:
<http://localhost:8080/exist/apps/tei-publisher/index.html?tab=0&collection=test>
- ❑ Playground:
 - ❑ Area to upload your own documents and to test them with every ODD and templates to evaluate your need in terms of features
 - ❑ Playground:
<http://localhost:8080/exist/apps/tei-publisher/index.html?tab=0&collection=playground>
 - ❑ Instruction:
https://github.com/FloChiff/workshop-nlp-e-hri/blob/main/instructions/working_with_tei_publisher.md#discovering-the-playground

Working with your own production

Developing your own ODD:

- ❑ The ODD is the file where we will add the elements we want to display specifically (rendition, predicate, behaviour, template and/or parameters)
- ❑ Instruction:
https://github.com/FloChiff/workshop-nlp-ehri/blob/main/instructions/working_with_tei_publication.md#developing-your-own-odd

Generating your own application

- ❑ With the ODD and a chosen template, you can generate an application with all the basics elements needed and then, custom-made it
- ❑ Instruction:
https://github.com/FloChiff/workshop-nlp-ehri/blob/main/instructions/working_with_tei_publication.md#generating-your-own-application

Modifying the application as you want

- ❑ Displaying the facsimile: Visualize next to each other the transcription and the image it is coming from
- ❑ Creating and displaying modes: Showing the same element in various ways
- ❑ Creating a collection: Offering the possibility of various corpora into one application

Discovering the annotations' application

- ❑ [Importing the application](#): Add on your eXist/Docker the annotation application
- ❑ [Exploring the indexes](#): Discover all the named entities registered for EHRI
- ❑ [Exploring the files](#): Test how the various entities appear in the application

Working on some annotations

- ❑ Importing a document: Add new documents in the application
- ❑ Annotate a document: Encode some named entities (places, organizations, etc.) to your new documents

Thank you for your attention
